PROFESSIONAL SUMMARY

Full stack Developer with 3+ years of professional experience in Java, Spring Boot, and RESTful API development, I specialize in building scalable backend systems and ensuring software quality through test automation (REST Assured, Postman). Skilled in end-to-end development of GPS-based applications, healthcare platforms, and attendance systems using Spring MVC, Hibernate, and Kafka, I combine strong OOP principles with Agile practices to deliver robust, high-performance solutions. Passionate about performance optimization, API security, and CI/CD integration to drive seamless user experiences.

Wichita State University, Full Stack Developer Research Intern

(Dec 2023 – Oct 2024)

- Designed and developed a Java-based Attendance System, applying object-oriented programming (OOP) principles.
- Built RESTful APIs with Spring Boot to ensure seamless backend communication.
- Implemented GPS-based Attendance Application using multi-threading for real-time data processing
- Conducted API testing using REST Assured and Postman to validate backend services.

Applied data structures and algorithms to optimize performance and scalability.

Graffiti Infotech, Bengaluru

Java Developer (2Years)

(Jan 2021 – Dec 2022)

- Developed and maintained enterprise-grade Java applications using Spring Boot, Hibernate, and MySQL, improving system efficiency by 25%.
- Designed RESTful APIs for client projects, reducing response time by 30% through caching and query optimization.
- Integrated Spring Security for authentication/authorization, ensuring compliance with data privacy standards (HIPAA/GDPR).
- Collaborated with cross-functional teams using Agile methodologies, delivering 4 major projects on time.
- Mentored 2 junior developers in best practices for code reviews, debugging, and unit testing.

PROJECTS

Healthcare Management System

(Feb 2023 - Aug 2023)

- Developed a SaaS-based healthcare platform with Spring Boot, Java, Hibernate for patient data management.
- Designed and implemented REST APIs for CRUD operations, integrating Spring Security for authentication.
- Utilized MySQL & Spring Data JPA for optimized database performance.

Spring Boot CRUD Application

(Aug 2024 – Dec2024)

Tech Stack: Java, Spring Boot, RESTful APIs, Hibernate, MySQL, JPA, Swagger, Postman, Docker

- Built a full-stack CRUD application with REST APIs and Spring Boot
- Performed API testing using Postman and documented endpoints with Swagger.
- Implemented authentication, exception handling, and validation mechanisms.
- Containerized the application with Docker for seamless deployment.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, JavaScript, TypeScript

Frontend Development: JavaScript (Functional & OOP), HTML, CSS

Backend Development: Spring Boot, Spring MVC, RESTful APIs, Hibernate

Database Management: MySQL, MongoDB, Spring Data JPA

Software Development Concepts: Computer Architecture, Data Structures, Algorithms, Design Patterns, API Testing, Functional Testing, CI/CD Pipelines

Tools & Technologies: Git, Postman, IntelliJ IDEA, MySQL Workbench
System Development: Multi-threading, Performance Optimization, API Design
Collaboration & Development Practices: Agile methodologies, Product Design, Troubleshooting, Code Verification

EDUCATION

<i>Wichita State University, Wichita, KS, USA</i>	<i>Dec 2024</i>
<i>Masters in Computer Science</i>	
<i>Vellore Institute of Technology, India.</i>	<i>May 2022</i>
<i>Bachelor's in Computer Science</i>
